

Editorial

Three years down the line, the SAFOG journal is now indexed and will also soon be available on PubMed. We have finally a fixed format of the journal with Review, Original Articles and some Nursing Practices and Case Reports.

HIV AIDS is a problem which the world has to live with and with no vaccine in near future, only awareness and safe sexual practice will work. Our guest editorial of this issue addresses the problems of sexual orientation and behavior in southeast Asia. A brilliant review on cancer endometrium is in this issue.

The original studies address PCOS, obstetric ICU, prevention of PPH by intramyometrial syntocinon, Pap smear and GKS-PIMS scaring for external cephalic version.

The contemporary studies, clinical studies, surgical skills, nursing practice and case reports make interesting reading.

The online resources with this journal are the various sting operation videos.

Happy reading and Happy viewing.

Regards
